

WHAT IS SEAGRASS AND WHY DO WE NEED TO PROTECT IT?

At Six Senses Kanuhura, we let the grass grow underwater! Seagrass might not be flashy, but it's a hidden hero of the ocean. It provides a safe nursery for baby fish, feeds gentle turtles, and keeps our lagoon crystal clear by trapping sediment. Plus, it's a powerful carbon absorber, helping fight climate change right from the seabed. So next time you spot those underwater meadows, give a little wave, they're working hard to keep our paradise pristine.

- 1 House Reef** (max. 4m depth) – Level: Beginner
The House Reef snorkeling is a complimentary, guided snorkel experience by our Marine-Biologist, featuring vibrant corals, diverse marine life, and excellent visibility, just a 2-minute boat ride from the resort.
- 2 Coral Garden** (max. 2m depth) – Level: Beginner
Located just 50m from the Snorkel Pavilion, the Coral Garden is an easily accessible shore snorkel site, teeming with vibrant corals, reef sharks, rays, and schooling snappers.

- 3 Ray Point** (max. 2.5m depth) – Level: Intermediate
Ray Point is a serene, shore-access snorkel spot known for frequent stingray sightings, including marble, porcupine, cowtail, and whip rays - along with occasional turtles grazing in the seagrass.
- 4 Meadow Crossing** (max. 2m depth) – Level: Intermediate
Located just beyond Drift restaurant at Jehunuhura, Meadow Crossing is a dynamic seagrass snorkel site where eagle rays, reef sharks, and nurse sharks are often seen. An exciting marine adventure paired perfectly with a meal at Drift.
